15.

1. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: means for generating the multiple linked-list chains of data packets, means for transmitting the multiple linked-list chains of data packets and means for controlling the joining of multiple linked-list chains into a single linked-list chain as in claim 1, and means for forming first and second independent linked-list chains of data packets, means for transmitting the first and second independent linked-list chains of data packets, and means for allowing the first and second independent linked-list chains of data packets to continue to exist independently for an indeterminate amount of time as in claim 2.

Claims 15-21 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: transmitting the multiple linked-list chains of data packets and controlling the joining of multiple linked-list chains into a single linked-list chain as in claim

2. Claims 1-7, 15-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 2, 15 and 16, it is unclear as to how the multiple linked-list chains of data packets or independent linked-list chains of data packets are formed and how they are controlled to be joined into a single linked –list chain or controlled to exist independently for an indeterminate amount of time. Furthermore, in claims 1 and 15, it is also unclear as to what is

Application/Control Number: 09/991,415

Art Unit: 2665

intended to be the claim limitation by reciting "multiple linked-list chains of data packets transmitted by communications stations supported by said network at a particular point in time are not always thereafter joined into a single linked list chain"?

- 3. No prior art rejection can be applied at this time due to the nature of ambiguity and indefiniteness of the claim language as addressed in the above paragraphs.
- 4. Claims 8-12, 22-26 are allowed.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Joshi et al. '301 & '062, Cisneros et al., Delp et al. and Krishnakumar '779 are all cited to show the common feature of data communication utilizing linked-list architecture and scheme similar to the claimed invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (703)305-4377. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (703)308-6602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
